

Dear Robert Gyorodi,

Congratulations! University of Oradea has been designated as a Microsoft Dynamics Academic Alliance Premier Member!

In March of 2017, we conducted our mandatory survey of all Microsoft Dynamics Academic Alliance member institutions. We used the results from this survey to determine your institution's membership level and benefits for the upcoming academic year. Your institution has been designated as a Microsoft Dynamics Academic Alliance Premier Member.

As a Premier Member you have access to:

- Donated Microsoft Dynamics software for classroom/labs
- Free technical support from Microsoft Dynamics product experts
- Free training and course materials
- The Dynamics Learning Portal (DLP)
- Access to the Academic Alliance [Resource Portal via CustomerSource](#)
- Invitations to Microsoft events
- Connections with Microsoft Dynamics partners and customers

As a Premier Member you also have the opportunity to access additional benefits, including:

- Invitation to participate in exclusive programs and Microsoft events
- Success story features for innovative programs

Your institution has demonstrated a higher commitment to engage in the Academic Alliance community and enriching the student experience with Microsoft Dynamics in the classroom.

Premier Members meet two or more of the below criteria annually:

- Use Microsoft Dynamics in 2 or more individual classes
- Actively engage with an identified Microsoft Dynamics Partner
- Member of the Microsoft Dynamics Student Certificate Program
- Teach certification-level curriculum
- Participate in one or more Microsoft conference or training event where registration is required

Annually, we re-evaluate membership levels for all Academic Alliance member institutions because it is important to your educational institution and to Microsoft that your institution's membership level accurately reflects your engagement. Your response to this survey ensures that your institution will receive the maximum benefits available through your Academic Alliance membership. Responding to the survey is mandatory for all Academic Alliance Members! Members who do not answer this survey will be identified as inactive members. After two survey rounds of inactive status, the membership will expire and accounts will be locked.

If you have any questions, please let us know.

Thank you for participating in Microsoft Dynamics Academic Alliance! Thank you for your commitment to enriching your students' experience in the classroom. We look forward to building a stronger relationship with your institution!

Sincerely,

The Microsoft Dynamics Academic Alliance Team
