Creat. Grow. Delivery our story to millions.

Android Developer

Mobile first. Innovation. Disruption. Continuous optimization. Customer centricity.

If you believe those terms define today's mobile ecosystem, we would like to have you in our team at Banca Transilvania.

What we offer:

- The opportunity to work for an innovative product
- Attractive benefits package
- The chance to work with people that are passionate about innovation and business evolution, determined to change the way we do banking today
- Personal and professional development trainings and courses
- Working environment and team that will make you enjoy the time spent in the office
- Access to the latest technologies
- Multiple online and offline benefits from our partners, nationwide
- Helpful insights for the financial system domain
- After work recreational activities, together with the team
- Other benefits that make us one of the most wanted company to work for, in Romania.

To perform in this role, we would like you to have:

- Bachelor's degree in Computer Science or relevant experience –it's important to know the fundamental theories that guide a proficient developer, but we cherish even more your hands-on experience
- Solid understanding of Design Patterns
- Solid experience in Android development
- Experience with REST, JSON, XML
- Knowledge of MVVM architecture
- Experience with Java and Kotlin
- Understanding of Android's design principles and interface guidelines
- Knowledge in source control management (GIT/SVN)
- Ability to organize, autonomy and teamwork
- Good communication skills in both written & verbal English

If you'll join our team, you will be challenged to:

- Develop applications for mobile and tablet (wearables should be also considered)
- Work in an innovative environment, develop projects using various technologies
- Collaborate with cross-functional teams to configure and customize mobile solutions in order to improve and deliver new features
- Manage third-party integrations;
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency
- Bring your own ideas and shape them into innovative working solutions

Full Stack Developer

Innovation. Disruption. Continuous optimization. Customer centricity.

If you believe those terms should define today's financial ecosystem, we would like to have you in our team at Banca Transilvania.

What we offer:

- The opportunity to work for an innovative product
- Attractive benefits package
- The chance to work with people that are passionate about innovation and business evolution, determined to change the way we do banking today
- Personal and professional development trainings and courses
- Working environment and team that will make you enjoy the time spent in the office
- Access to the latest technologies
- Multiple online and offline benefits from our partners, nationwide
- Helpful insights for the financial system domain
- After work recreational activities, together with the team
- Other benefits that make us one of the most wanted company to work for, in Romania.
