Technical Project Manager

The Company

Octavic's Industry 4.0 system is a market-leading solution adopted by the pharmaceutical, food & beverage, automotive, and other industries all around the world. Our aim is to change the industry landscape by using the latest technologies to reduce waste, achieve top efficiency in factories and improve people's daily work life.

To find out more about us, see https://octavic.io

The position

We're looking for ambitious, energetic and motivated individuals to be part of our journey to change the digital industrial landscape by providing project management and communications support for our projects relating to EU funded R&D initiatives and customer projects.

Your profile

An **experienced Technical Project Manager** (who preferably has previously been involved in EU funded projects) to lead the development and implementation of our innovation projects that are part of European funding mechanisms, as well as system implementation projects for our customers.

- Minimum two years **technical project management experience**
- **Previous experience** in program or **project management** in the framework of EU funded programs is considered a strong advantage
- Demonstrated **understanding of project management processes**, strategies, and methods
- Excellent **problem-solving** and **organizational** skills, as well as **analytical thinking**
- Excellent command of English language (reading, writing and speaking)
- A **degree in engineering**, computer science or a related field is preferred

The daily challenges

As Technical Project Manager, you will work closely with the company's dynamic management team to ensure the smooth running of these projects:

- **Manage projects** with top-down oversight throughout entire execution **to ensure success** as defined by adherence to standards of scope, budget, and timeline.
- **Monitor project progress** continuously and **make scheduled reports** on measurable items, such as milestones and deliverables

- **Communicate proactively** with all involved personnel to provide encouragement, identify problems, create solutions, and implement efficiency improvements.
- **Maintain project time frames**, budget estimates and status reports.
- Oversee and **maintain project documentation** in strict adherence with project requirements.

What we offer:
- Market competitive compensation structure
- Friendly, young, and dynamic environment
- Flexible schedule with a lot of autonomy, focused on results rather than micro-management
- Opportunity to work with the latest industrial technologies
- Professional growth opportunities in an expanding industry

- Solid product that literally changes the industrial landscape in the digital era

If you find yourself in the above, reach out to us via office@octavic.io
We'd love to get a coffee together to know each other!
